

The 56th annual Elizabethton Fall Bird Count was held on October 4. We had 25 observers participating in 10-13 parties. The weather was good, with clear skies, no wind, and temperatures ranging from 42-82 degrees.

We tallied 120 species, plus 2 gull sp. and 1 Empidonax sp. This total is slightly below the recent 30 year average of 124 species. The all-time high on this count was 137 species in 1993.

Notable misses: White-eyed Vireo, Blue-gray Gnatcatcher, Winter Wren, Hermit Thrush, and Blue Grosbeak.

We held the count a week later than usual (due to the TOS fall meeting in Johnson City). This may have accounted for some of the misses or low numbers for some species (e.g., just 1 hummingbird); but, may have contributed to finding some of the later migrants (e.g., Orange-cr. Warbler, White-thr. Sparrow). The count has been held on the first Saturday in October a few times previously.

Thanks to all participants.
